CUSTOMERS PLEASE READ CAREFULLY

In catering to the public thru the medium of this catalog, we wish to say it is our earnest desire to be worthy of the confidence of every patron, that every order, regardless of how small or how large, will be filled with the most scrupulous care with the best quality and size of varieties, and true to name.

All flower lovers should appreciate the opportunity they now have of becoming familiar with the beautiful wild flowers of the Rocky Mountain region. There is no practical reason why many of our most beautiful wild flowers should not be much in evidence in cultivated gardens, combining as they do, ease of culture with an airiness and grace, and beautiful soft, refined colors, which places them in a class entirely by themselves. We endeavor to give sufficient cultural instructions to make success reasonably certain, and if followed, our patrons will experience no difficulty in attaining satisfactory results.

Owing to the fact that some varieties are collected plants, we generally fill orders from early Spring until late Fall. As many wild flowers die down to the ground after flowering and forming seeds, care should be taken not to disturb the roots, which still remain green, but dormant, and put forth a new plant the following season. With many varieties, the best time for transplanting is after blooming in the Spring, when they remain dormant until the Fall, or the next Spring. For these plants, such as iris, delphinium bi-color, dodecatheon, mertensia, cypripedium, etc., the best time for planting is June, July and August.

While we are in a position to furnish any plant, or quantity of plants indigenous to Montana, we have listed but the most desirable varieties, selected for their beauty and ease of culture.

In all cases the postage, express, or freight is to be paid by the purchaser. If plants are desired sent by parcel post, add 10% of the purchase price to all points west of the Mississippi River, and 15% to all points east of the Mississippi River.

Terms, cash with order. Remittances may be made by P. O. order, Express M. O., Bank Draft, or where the amount is less than one dollar, postage stamps in two cent denominations will be accepted.

After the goods leave our control, we give no warranty, express or implied, as to quality or condition, and assume no responsibility thru failure or delay in transit. Keep a duplicate of your order, and notify us promptly in case of errors on our part, as it is our desire that customers should be satisfied in every respect.

Address all orders to S. A. CAMP, OVANDO, POWELL CO., MONTANA.

ALL PERENNIAL PLANTS unless otherwise noted are 25c each, or \$2.50 per dozen.

ACHILLEA, Milfoil, Boule de Neige. A pretty little white flower, very double, and grows about 18 inches tall. Considered superior to the Pearl, of the milfoils.

ACONITUM napellus. Monkshood. Bluish purple flowers on long spikes, 4 to 5 feet tall. Blooms in the Fall. Very peculiar, odd shaped flowers.

ANAPHALIS margaritaceae. Native. A pretty little everlasting a foot tall, with double white flovers. Grows in sun or shade.

AQUILEGIA flavescens. Native Columbine. 1 to 3 feet high, with clear, golden yellow flowers. A very beautiful, graceful flower. Does well in sun or shade.

AQUILEGIA Hybrids. Finest long spurred, in many combinations of colors, blue and white, red and yellow, purple and white, pink and yellow, clear white, cream, etc. All colors mixed, not separate.

AQUILEGIA truncata. This is a beautiful bright red and yellow variety from Alaska. Grows 2 to 3 feet tall, and does well in either sun or shade.

ARNICA alpina. Native. This graceful little plant has bright yellow ray flowers an inch or more across, and is about a foot high. Grows in the high mountains in sun or shade.

ARNICA cordifolium. Native. Grows 1 to 2 feet tall in either sun or shade. Flowers a clear, bright yellow, 2 inches or more across. One of the most beautiful ray flowers we have. Lasts well as a cut flower.

ASTER laevis, var. geyeri. Native. This is our most beautiful perennial aster. Grows 2 feet high, with clear blue flowers an inch across. Does well in sun or light shade and common garden soil.

ASTER, Novae belgae. Two feet tall, with flowers an inch across of a clear, soft, rose color.

CAMPANULA persicifolia. Large, bell-shaped, white flowers, two inches across. Grows 2 to 3 feet tall.

CAMPANULA rotundifolia. Hare Bells. Native. 18 inches high, with wiry stems, and small, bell-shaped, blue flowers. This is the bluebell of song and verse, and is a very beautiful, graceful, little flower.

CASTILLEJA miniata. Native. Two feet high, with bright, vermilion red flowers and bracts. Found growing in sun or light shade, and is known locally as Indian Paint Brush.

CHIMAPHILLA umbellata. Prince's Pine. Native. An evergreen plant, 8 inches high, with white or pink flowers. Shade.

CHRYSOPSIS villosa. Golden Aster. Native. Eight inches tall, with bright yellow ray flowers an inch across. Fine for the rock garden. Sun and common garden soil suits it.

CLEMATIS Douglasii. Native. Bushy plants, growing 12 to 18 inches high, with finely cut foliage, and velvety, dark purple flowers in Spring. Full sun and a rather dry soil.

CLINTONIA uniflora. Native. Large leaved plants for a shady place. Eight inches tall. Foliage resembles Lily of the Valley. Flowers lily-shaped, over an inch in diameter, of a clear, waxy white.

ALL PERENNIAL PLANTS unless otherwise noted are 25c each, or \$2.50 per dozen.

CYPRIPEDIUM montanum. Mountain Lady Slipper. Native. Grows in shady woods, 19 to 24 inches tall. Fragrant white flowers, veined with purple, and with brown sepals, and a very odd and beautiful flower. Quite rare. Will do well in garden soil, in shade, but with no fertilizer. The most suitable time for replanting is in July. 35c each, \$3.50 per doz.

DELPHINIUM belladonna. Larkspur. 4 to 7 feet tall, with large, clear turquoise blue flowers. The most popular larkspur.

DELPHINUM bellamosum. Same as the above, but has brilliant, deep blue flowers.

DELPHINIUM bi-color. Native Larkspur. A foot tall, with large, peep purple flowers in open panicles. Blooms very early in Spring, which extends the larkspur season. Full sun.

DELPHINIUM chinensis alba. Same as above with white flowers. A beautiful variety.

DELPHINIUM Moerheimi. Grows 7 to 8 feet high, with long spikes of large white flowers. An exceptionally fine variety.

DIANTHUS barbatus. Sweet Willian. An old fashioned flower which is always popular. Rich, velvety crimson flowers, double and fragrant.

DIANTHUS deltoides. Maiden Pink. This beautiful little flower is a fine subject for the rock garden and for borders. Blooms in the greatest profusion, with deep, rose colored flowers. Grows 8 inches high.

DIANTHUS plumosus. Grass Pink. Fragrant, single, pink flowers with maroon colored center.

DICENTRA spectabilis. Bleeding Heart. Two feet tall, with fine foliage, and graceful, heartshaped pink and white flowers, and altogether one of our most beautiful most hardy perennials. Heavy, field-grown clumps. 50c each. \$5.00 per dozen.

DODECATHEON pauciflorus. Shooting Star. Native. A charming little plant about ten inches tall. Deep pink flowers with a delicate fragrance. does well in light shade or full sun and common garden soil.

ERIGERON salsuginosus. Mountain Daisy. Native. Grows 1 to 2 feet tall, with lavender or pink ray flowers, about two inches in diameter, with yellow centers. Situation, sun or light shade.

GAILLARDIA aristata. Brown-eyed Daisy. Native. Has gorgeous, radiant flowers 3 inches across, brilliant yellow with a maroon center. Makes a splendid cut flower.

GAILLARDIA grandiflora. Hybrids of many combinations of colors, yellow, crimson, orange, vermilion, etc. Blooms thru the whole season. An ideal cut flower.

GALIUM boreale. Northern Bedstraw. Native. A foot or more tall, with small, white fragrant flowers in large panicles. Easily grown in either sun or light shade.

GEUM. Mrs Bradshaw. A beautiful flower for cutting, with double, brilliant scarlet flowers. Grows 2 feet high.

GYPSOPHILA paniculata. Baby's Breath. Plants form a large bush 3 feet high and 4 feet across, covered with small white flowers, which make fine bouquets.

ALL PERENNIAL PLANTS unless otherwise noted are 25c each, or \$2.50 per dozen.

HEUCHERA sanguinea. Coral Bells. Two feet high. Small bell-shaped, coral red flowers with long, wiry stems. Of great value as a cut flower.

HYPERICUM Scouleri. Native. A foot high, with beautiful bright yellow flowers in terminal clusters. Flowers $\frac{3}{4}$ inch in diameter. Garden soil and sun meet all its requirements.

IRISES

THE IRIS may be planted in either Spring or Fall, but soon after they have finished flowering is considered the best time. If possible, give a sunny location, and plant them with the rhizomes, or large root at the surface of the soil, and pack soil around the roots. Our stock of iris is unexcelled, being grown under the most favorable conditions as to soil and climate.

- I. **FLAVESCENS.** Standards and falls a delicate shade of fine soft yellow.
- I. **FLORENTINA alba.** S. and F. pearly white, faintly flushed with lavender. Very fragrant.
- I. **HER MAJESTY.** S. lovely rose-pink. F. deeper pink, flushed with crimson. A beautiful variety.
- I. **INNOCENZA.** Standards and Falls a beautiful ivory white. A fine, large flower.
- I. **KHARPUT.** S. and F. dark purple. A very large and extra fine flower.
- I. **MADAME CHEREAU.** S. and F. white. Petals delicately edged with blue. A very popular variety.
- I. **MISSOURIENSIS.** Native. This is the iris which is native to most of the Rocky Mountain region, and it is well worthy of cultivation in any garden. The falls and standards are flushed with pale lavender, delicately penciled with blue and violet. Does well in any garden soil.
- I. **RHEIN NIXE.** S. pure white. F. raspberry red, edged and reticulated white. Extra fine.
- I. **SHERWIN WRIGHT.** S. and F. are a rich golden yellow, without any markings. The very finest yellow, and a superior iris in every way.
- I. **SIBIRICA.** S. and F. brilliant blue. This iris is of a different habit of growth from those listed above, the flowers growing on wiry stems three feet tall, and foliage grassier.
- I. **SIBIRICA, SNOW QUEEN.** Same as above, but the standards and falls are clear ivory white.
- I. **PUMILA.** Atroviolacae. S. and F. fine purple. A very early dwarf variety.
- LAPPULA floribunda.** Native. Resembles a forget-me-not. Grows two feet tall. One of the finest real blue flowers of the Rocky Mountains, being of a brilliant, deep, sky-blue. The corolla is a half inch across, the large panicles of flowers forming a brilliance of coloring in the mountain meadows not easily forgotten.

ALL PERENNIAL PLANTS unless otherwise noted are 25c each, or \$2.50 per dozen.

LEWISIA rediviva. Bitter Root. Native. This beautiful little native has been honored by being made the State Flower of Montana, a position it most fittingly deserves. Named by Pursh in 1806 for Capt. Meriwether Lewis. The plant grows but a few inches high, with large satiny-pink flowers. A beautiful subject for the rock garden. Should have a rather dry soil and full sun.

LINUM Lewisii. Fairy Flax. Native. A delicate looking plant, two feet high, found in low mountain meadows as well as on the tops of the highest mountains. Flowers an inch in diameter, of a light almost translucent, sky-blue.

LITHOPHRAGMA heterophylla. Woodland Star. Native. A dainty, beautiful little plant, 10 to 18 inches tall, with white flowers nearly an inch across, with prettily slashed petals. Give a sunny location.

LUPINUS laxiflorus. Lupine. Native. 2 to 3 feet tall, with long spikes of blue flowers. Does well in sun or shade.

LYCHNIS chalconica. Maltese Cross. Grows 2 to 3 feet high, with fiery, vermilion red flowers in large clusters.

MERTENSIA oblongifolia. Blue Bells. Native. 10 to 12 inches high, with clusters of beautiful, bell-shaped, clear blue flowers, with rose colored buds. Ordinary garden soil and full sun seems to satisfy all its requirements.

MIMULUS Lewisii. Monkey Flower. Native. This handsome plant grows near mountain streams, and is 2 feet or more tall. Flowers two inches long, of a bright rose color. Grows in sun or shade.

MIMULUS Langsdorfii. Monkey Flower. Native. Inhabits moist places in full sun. One foot tall, with beautiful, clear, bright yellow flowers two inches long.

MYOSOTIS alpestris. Forget-me-not. Six inches tall, with sky-blue flowers covering the plant. Does well in shade, and makes a fine border plant.

PENTSTEMON cyanthus. Native. Flowers clear, soft blue, on two foot stems. The corolla has a white throat, artistically shaded with deep sky-blue, brilliantly variegated. The foliage is bright, glossy green. One of our most beautiful and conspicuous wild flowers, and a fine plant at all seasons. Improves with garden cultivation.

PENTSTEMON torreyi. Height 3 to 4 feet. Flowers more than an inch long, vivid scarlet, and growing in long spikes.

PHLOX Douglasii. Native. This little plant is a fine subject for the rock garden. Requires a sunny location, is but a few inches tall. Flowers white or pink.

PHLOX Miss Lingard. Two Feet or more tall, and early flowering. This grand white variety is the most popular phlox grown.

POLEMONIUM reptans. A low growing variety about a foot tall, covered with dainty blue flowers one half inch across.

PULSATILLA hirsutissima. Wind Flower. Native. Is 8 to 12 inches high, with deep lavender blue flowers, 2 inches or more across. Blooms very early in Spring.

ALL PERENNIAL PLANTS unless otherwise noted are 25c each, or \$2.50 per dozen.

PYRETHRUM hybridum. Beautiful hardy perennials, 1 to 3 feet tall, with fine, fern-like foliage, and ray flowers, ranging from white to crimson.

PYRETHRUM, Salmon Pink. This is probably the finest pyretherum grown. Three feet tall, with large flowers of a beautiful shade of salmon pink, with broad petals, and superfine in every respect. 35c each. \$2.50 per dozen.

PROLA rotundifolia. Native. A little woodland plant growing 8 to 12 inches tall, with spikes of waxy pink flowers.

RUDBECKIA, Golden Glow. An old-fashioned flower, but still very popular, which proves it has merit. 7 to 8 feet high, with large, double, brilliant yellow flowers more than two inches in diameter. Makes a fine cut flower.

SEDUM Douglasii. Native. A fine little plant for the rock garden. Grows 6 inches high, foliage fleshy and yellowish green. Star-shaped bright yellow flowers.

SOLIDAGO serotina. Golden Rod. Native. This is our finest golden rod. Grows one to two feet tall, with large graceful, feathery plumes of brilliant yellow flowers. Blooms from midsummer to late fall. Give a dry, sunny location.

THALICTRUM Fendleri. Meadow Rue. Native. This is conspicuous for its grace and airy effect, resembling Maiden-hair Fern. More than two feet tall, with small greenish flowers like gossamer tassels. Smooth, finely cut, bright green leaves. There is probably nothing superior for using with cut flowers. Does best in shady location.

THLAPSI alpestre. Wild Candytuft. Native. A pretty little plant with white flowers, found growing in dry, sunny situations.

VAGNERA amplexicaulis. Smilacena. Native. Two feet tall, with a feathery cluster or fragrant, cream-colored flowers. Grows in shady woods.

VAGNERA sessilifolia. Native. A shade loving plant, 2 feet high, with an open panicle of small, star shaped, white flowers.

XEROPHYLLUM tenax. Elk Lily. Bear Grass. Native. A magnificent plant, 3 to 5 feet high. The flower cluster grows at the top of a long stalk, and is composed of hundreds of fragrant, creamy white flowers, a half inch across. Requires a rather dry situation, in either sun or shade. The Indians make their finest baskets from the long grassy leaves from the base of this plant. 40c each. \$4.00 per dozen.

BULBS

We deliver bulbs after Sept. 1st, and they may be planted at any time before the ground freezes, but the sooner they can be planted after receiving, the better. We book orders at any time, from early Spring to late Autumn.

CALOCHORTUS Nuttalli. Butterfly Tulip. Native. Grows a foot tall. White flowers over two inches across. Plant two inches deep and three inches apart, in sun or shade.

-
- CAMASSIA** quamash. Camas. Native. This beautiful flower is found growing in mountain meadows, and is about two feet high. The flowers are deep blue, two inches across, and five to twenty-five blossoms on each stem. Fine for naturalizing. Plant three inches deep, and five inches apart. They will thrive anywhere and in any kind of soil. 60c per dozen.
- ERYTHRONIUM** grandiflorum. Dog-tooth Violet. Native. Grows a foot tall, with fragrant, bright yellow, lily-shaped flowers over two inches across, and two to five flowers on each stalk. Plant two inches deep in shady location. 60c per dozen.
- FRITILLARIA** pudica. Golden Bells. Native. Grows 8 inches tall. Golden yellow, bell-shaped flowers over an inch long. Plant 2 inches deep, and 3 inches apart in sunny location. 10c each. \$1.00 per dozen.
- GLADIOLUS**. Many fine varieties, mixed. Good, blooming sized bulbs, delivered \$1.50 per hundred.
- NARCISSUS**, Alba Odorata. Flowers double, waxy white, exquisitely beautiful and delicately fragrant. Makes a fine cut flower. The bulbs multiply rapidly, are very hardy and free from disease. Considered by many the grandest narcissus grown. 15c each, \$1.50 per dozen.
- NARCISSUS** Poeticus Ornatus. Flowers large, pure white, cup is yellowish, scarlet edge. 12c each, \$1.25 per dozen.
- SCILLA** campanulata. Spanish Bluebell or Wood Hyacinth. Spikes of bell-shaped blue flowers. Fine for naturalizing. 60c per dozen.
- TRITELEIA** grandiflora. Indian Hyacinth. Native. Strong, wiry, stems two feet tall, with a cluster of 12 or more light blue, fragrant flowers, each an inch long. Plant the bulbs 3 inches deep. Location sun or light shade. 15c each, \$1.50 per dozen.
- TULIP**, Beacon Light. 12 inches tall. Double, glowing scarlet, and a fine forcer. 80c per dozen.
- TULIP**, Schoonard. 12 inch. Considered the very finest double white. 80c per dozen.
- TULIP**, Tournesol. 12 inch. Bright yellow streaked with scarlet. The finest double of its color. 80c per dozen.
- TULIP**, Darwin, Ariadne. Bright scarlet with a blue base. Fine in every way. 70c per dozen.
- TULIP**, Darwin, La Tulipe Noire. Dark, velvety, blackish, maroon color. The darkest tulip. 70c per dozen.
- TULIP**, Darwin White Queen. Large globular flowers of pure white, tinged pink when opening. 70c per dozen.
- TULIP**, Cottage, Inglescombe Yellow. Immense canary yellow flowers. Blooms at the same time as the Darwins and is called a yellow Darwin 70c per dozen.
